

Technology winks at the design in the new Ravaglioli wheel aligner

Sasso Marconi. January 2023 - Ravaglioli S.p.A., member of Vehicle Service Group (VSG) and leader in the motor vehicle equipment sector, is developing a new wheel aligner that decrees an unprecedented era for the historical brand.

AllOnWall Series – The High-tech Solution for Wheel Alignment. RAV3D2.0WALL is the new wheel aligner Ravaglioli has launched on the market and that opens the way to the AllOnWall series, a line of wheel aligners designed for those workshops that are increasingly more attentive to choosing work tools not only from a functional perspective, but also from the aesthetic viewpoint.

The wheel aligner no longer features the cabinet design, but is instead on a panel, on which everything necessary for wheel alignment operations can be placed. This solution offers total freedom and flexibility of movement without having to burden the workshop with bulky objects such as a data transfer tower or a PC.

The wall-mounted console lines are neat and sophisticated. Every element forming the wheel aligner is harmoniously positioned in the panel to always be highly practical. Styling details such as the graphics of the rubber matting of the 3D measuring head housing and the iconic backlit Ravaglioli logo with warm white LED bar make the ensemble even more modern and fresher.

Moving on to the more technical aspects, all alignment activities can be controlled from a 10" tablet that the operator carry with him or place on the lift during adjustment thanks to built-in magnets. This is a cutting edge approach that Ravaglioli set out to adopt to get even closer to the world of new digital devices.

The aligner boasts our well-tested measuring head technology with HD cameras and Real 3D target that is fully wireless with Bluetooth transmission. The 3D measuring heads are able to instantly read all vehicle angles with maximum precision, in this way considerably reducing operation time.

RAV3D2.0WALL is available in two versions:

- Large version with 3-point clamps.
- Light version combinable with 3- or 4-point clamps.

Massimo Mambrilla, VSGE Electronic Competence Center Director, said, *"The RAV3D2.0WALL wheel aligner depicts an actual style revolution for Ravaglioli, which does not want to just meet the functional requirement*

of the market, but also wants to meet the styling tastes of the end users. The brand is ever-faithful to its consolidated technological know-how, and once again demonstrates that it is able to develop pioneering solutions. In fact, Ravaglioli is the first player on the market to have place wheel alignment operations in the palm of a hand by using tablets. If I were to describe this wheel aligner in three words, I would say: innovative, elegant, efficient”.

About Ravaglioli

Founded in 1958 in Sasso Marconi (BO) with the aim of designing and marketing vehicle lifting equipment, Ravaglioli has expanded its offering over the years to become Europe's leading builder of vehicle lifts and one of the main companies in the production of equipment for tyre shops and diagnostics (vehicle control and wheel alignment). Member of Vehicle Service Group (VSG) since 2016, it is one of the leading brands in the VSG EMEA division. In addition to its historical headquarters in the hills of Bologna, it has three additional production units in Ferrara, Rolo (Reggio Emilia) and Turin, and three subsidiaries in France, Germany and the UK. Additional information is available at www.ravaglioli.com.

About Vehicle Service Group

Part of Dover Corporation's Engineered Systems segment, VSG is a strong, diverse and dynamic global leader in the vehicle service industry. It comprises 8 major vehicle lifting, wheel service and collision repair brands: Rotary, Ravaglioli, Space, Chief, Forward, Direct-Lift, Revolution and Hanmecson. Headquartered in Downers Grove, Illinois, VSG has operations worldwide, including ISO9001 certified manufacturing centers in North America, Europe and Asia. Additional information is available at www.vsgdover.com.
