

**Pressure plate  
assembly device for removal and  
installation of truck transmissions  
cDISK**

**Blitz**<sup>®</sup>

## The simple solution for difficult tasks

Due to their extremely heavy weight of up to 80 kg, truck transmissions, in particular their pressure plates, are very difficult to install and/or remove. With the new cDISK from BLITZ this task has now been simplified considerably.

Together with existing equipment (pit lift, crane etc.) the pressure plate and/or the flywheel can be mounted easily by one person. The adjustable tilting angle as well as the registered ROLLFIT-System\* guarantee an ergonomic workplace.

### cDISK Die Cast Housing Adapter

For pressure plates with die cast housing. The support takes place within the cup washer by means of revolving locking (necessary e.g. for MB A0072501404/A0072505204).

Order No.: 101758

### cDISK Adaption for flywheel

Positive locking of flywheel is guaranteed by spanner bolts.

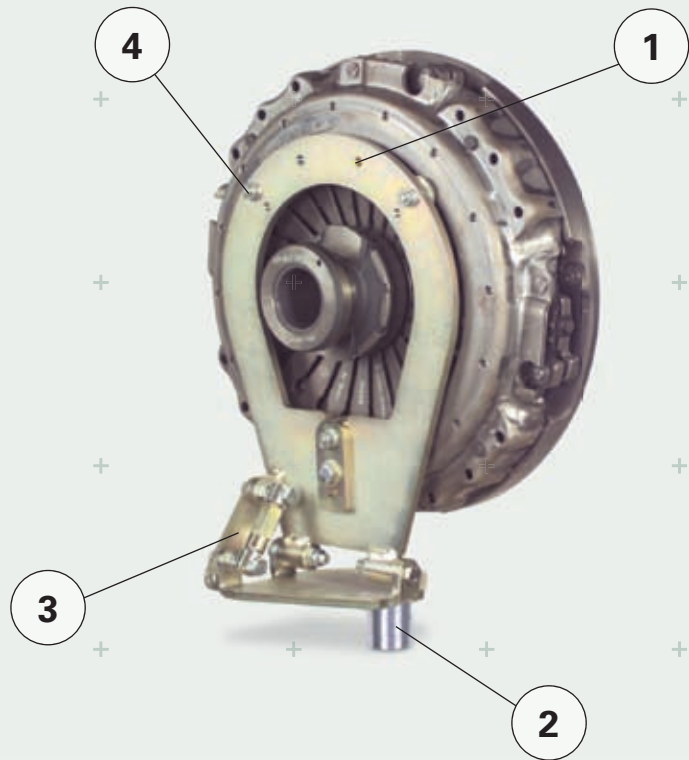

Order No.: 3745430

### cDISK EvoBus Extra Kit

To support EvoBus pressure plates the standard support rollers must be exchanged for the rollers from the Extra Kit.

Order No.: 100626

### Product features

- **1. ROLLFIT-System\***: Due to the registered ROLLFIT-System\* the pressure plate can be turned to any desired position on the support. Important for exact alignment of the pressure plate with the flywheel.
- **2. Flexibly applicable**: As well as several exchangeable pegs, a mounting arm and a transporting grip are all part of the standard delivery. The cDISK can thus be applied either from under the vehicle carriage or from above.
- **3. Adjustable tilting angle**: Complementing the ROLLFIT-System the pressure plate adapter can be tilted by  $\pm 10^\circ$ . Should the transmission unit not be exactly horizontal – for instance whilst carrying out maintenance work on buses – then the angle can be optimally adapted.
- **4. Different hole circles**: The possibility of positioning the support rollers at different points enables the support of all common pressure plates.

\* Registered design Germany No. 20207841.8.
