

VSG launches a new pit lift model of the Blitz Series for Rotary brand

Bräunlingen. February 2024 - Vehicle Service Group (VSG), a leader in automotive equipment, launches a new suspended pit lift model of the Blitz Series for Rotary brand.

The Blitz Series is one of the cornerstones of heavy duty engineering by Rotary with a capacity of 17 t. Developed with a long-standing lifting technology experience, the pit lifts of this series are recognized for outstandingly conceived safety design combined with ergonomic operating comfort.

The series is composed by two main typologies:

Floor-running pit lifts include Blitz M, R and X models.

Each of them has specific features to meet the different needs of the workshop.

- Blitz M: models with integrated cross suspension for optimum precision work.
- Blitz R: models that expresses their maximum potential in connection with rails.
- Blitz X: models characterized by classic chassis design for maximum flexibility.

All the above-mentioned models are available with 2-stage or 3-stage telescopic design.

Suspended pit lifts include Blitz S as well as the new Portal Lift 17 Vario.

These models differentiate from the floor-running for their suspended operation that creates a free passage in the pit.

Portal Lift 17 Vario is the newcomer in this range that consolidates the well-known standards of Rotary with the addition of three main features that makes the heavy duty operations a lot easier.

Turn 3 into 1 - unique combination that allows you to pick up, lift and support any vehicle.

Fully adaptable to any pit – measuring the pit becomes a minor matter due to the adjustment of the chassis in height and width.

Ergonomic control - wired remote control of the lifting operations.

For more information on the Blitz Series, consult the landing page – blitz-series.rotarylif.eu.

About Rotary

As part of the Vehicle Service Group (VSG), one of the world's leading automotive equipment companies, Rotary has been providing car lifting solutions with innovative features since 1925. Rotary has then extended its portfolio with products for the areas of truck lifting, tire service and diagnostics, to be able to cover the entire range of workshop needs. Located in Bräunlingen (Germany), it's one of the leading brands in the VSG EMEA division. For more information, visit www.rotarysolutions.eu.

About Vehicle Service Group

Part of Dover Corporation's Engineered Systems segment, VSG is a strong, diverse and dynamic global leader in the vehicle service industry. It comprises 8 major vehicle lifting, wheel service and collision repair brands: Rotary, Ravaglioli, Space, Chief, Forward, Direct-Lift, Revolution and Hanmecson. Headquartered in Downers Grove, Illinois, VSG has operations worldwide, including ISO9001 certified manufacturing centers in North America, Europe and Asia.
