

## Kit STDA159

With this kit, you can convert the 6CCD truck aligner used primarily for trucks and buses, with RAVTD8060TWSR lowered measuring heads, into a car aligner compatible with all types of vehicles. It consists of a frame that can be easily secured behind the cabinet with the aid of two screws already available in the corners.

Its use is recommended for those workshops that mostly work on trucks and buses, but that sometimes need to perform wheel alignment operations on cars as well. The pair of front measuring heads is selected before each diagnosis, without having to reassociate them every time.

All data transmission is via Bluetooth, making the operation quicker and more reliable. The kit comes with a pair of supports for charging two front vehicle sensors. (These two sensors are not included and must be purchased separately)

# Additional accessories

For wheel alignment operations on cars, front measuring heads 18422-18423 have to be purchased separately.

For wheel alignment operations on trucks and buses, measuring heads RAVTD8060TWSR supplied with the aligner must be used.

**S110A7**  
Turn tables  
Diameter 310 mm  
Capacity 1,000 kg

Front measuring heads  
18422-18423

**STDA33EU**  
Pair of self-centring  
4-point clamps, grabbing,  
for 10" to 24" rims
