

LIFTING TABLE

FOR ENGINES, GEARBOXES & HV BATTERIES

Universal lifting table with a load capacity of 1 t. Suitable for easy and safe removal and installation of engines, gearboxes, HV batteries, and chassis components.

Developed on the basis of 20 years of experience as a manufacturer of lifting tables in cooperation with leading car manufacturers.

- + Simple and flexible handling
- + Reliable mounting and fastening of components
- + Wide range of accessories for all applications

A wide range of accessories (available separately) makes the lifting table an indispensable and universally usable workshop tool

Easy to maneuver even with load thanks to plastic rollers with ball bearings

The compact design provides plenty of space underneath the vehicle

14 mounting holes arranged on both left- and right-hand side of the platform offer plenty of possibilities to mount mounting tools

The shallow, slim design and the handle that can be moved vertically, make positioning underneath the vehicle very easy

Large castors and parking brakes ensure excellent mobility in the workshop

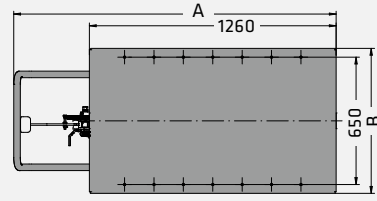

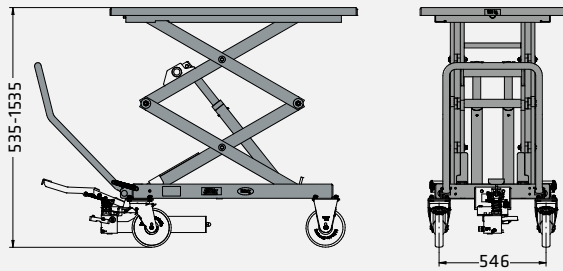

HIGHLIGHTS IN DETAIL

- 1** Fixed mounting plate with 2x 7 holes for secure mounting of various supports.
- 2** Using standard maintenance permits safe working when servicing the lifting table.
- 3** A hydraulically controlled lifting load stroke, which is activated by foot using a floor-mounted button, triggers the double-acting pump that ensures lifting any load quickly and effortlessly. Infinitely variable, exact control of the lowering speed using the adjustable lowering brake valve.
- 4** Two castors with integrated parking brakes make manoeuvring easy and parking safe.

MGE 1.0

Model	MGE 1.0
Rated load capacity	1,000 kg
Stroke	1,300 mm
Lifting height max.	1,835 mm
Lifting length max.	1,260 mm
Max. supporting width	740 mm
Overall height	535 mm
Surface coating	Powder coated
Corrosion preventing	Ultra High Solid Primer (UHS)
A Length	1,646 mm
B Width	740 mm
Weight	230 kg
Article number	130373

ACCESSORIES

1 GA Pkw: universally applicable for passenger cars. Particularly suitable for automatic transmissions. Tensioning strap to secure the load, large rubber supporting surface, load capacity 400 kg, Ø 35 mm pin, dimensions 300 x 240 mm (Only applicable in combination with universal adapter, Item No: 103544).

2 Aggregate plate with supporting arms: a particularly versatile aggregate plate for the removal and installation of engines, transmissions, axles, exhaust systems, etc. Extendable supporting arms with integrated threaded spindles and numerous support components allow easy adaptation to different mounting requirements.

3 Universal aggregate support: quick and safe removal & installation of the complete integral support frame, with all units in connection with the Master Gear lifting tables. Secured using a tensioning strap, yellow-chromated, weight 20 kg, max. load capacity 800 kg.

4 Universal support Ø 35 mm: fitted with a bushing, a mounting hole Ø 35 mm suitable for holding various tools, such as the transmission plate GA Pkw.
